Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 21, 2003 has been entered.

Election/Restrictions

2. Claims 2-5, 10, 11, and 13-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 7.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 26 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 26 depends from canceled claim 25. The scope of the claimed invention cannot be clearly determined.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 6-9, 12, 21-25, 26, and 28-30 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 401193174A. '174 discloses the claimed invention, including the abrasive porous body. Please refer to the attached partial translation, and figures 1, 2 and 3. Note that figure 3 shows the fluid dispersed in a direction parallel to the axis of rotation of the tool. Note that figure 2 shows a first and second side, defined by a plane through the rotational axis, and first and second outlets to deliver fluid to each side.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 20, 27 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 401193174A in view of Wohlmuth, 4,438,598. '174 discloses the claimed invention except for the fluid delivery system adapted to compensate for changes in material characteristics of the tool to assist in maintaining proper dispersal of fluid at a machining zone. '598, figure 1, teaches providing a deliver system which is adapted to compensate for changes in temperature of the tool to maintain proper dispersal of fluid

at the machining zone. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided '174 with the control system of '598, to ensure that hardness, wear-life, appearance and contour of the workpiece and/or tool are not impaired by improperly controlled temperatures.

Response to Arguments

9. Applicant's arguments with respect to claims 1, 6-9, 12, 20-24, and 26-31 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other similar tools are cited of interest.

11. Any inquiry concerning the content of this communication or earlier communications from the examiner should be directed to M. Rachuba whose telephone number is (703) 308-1361.
